EXPERIENCE

Da Nang City - *Freelancer*
Apr 2022 - PRESENT

BAP Software, Japan - *Full Stack Developer*
Mar 2021 - Mar 2022

- Established the microservice for the online software marketing platform using Node.js/NestJS, making the rapid delivery of software with a resulting 13% revenue increase.
- Produced a scalable payroll system throughout both front and back-end side using HTML/CSS, JavaScript/TypeScript, Go, and React.js/Next.js to effectively manage employees and reduce company costs by 3%.

- Reducing response times by 20% using Redis caching for quicker data retrieval.

Luvina JSC, Da Nang City - *Full Time Freelancer*

Oct 2017 - Aug 2020

- As a full time freelancer, I have participated in various web projects.

  At that time, I learnt lots of tech and especially I have gained lots of experiences in React, Vue, Svelte, Angular, Node.js, Go and Java.

  Also I learnt team collaboration, tips of project architecture, implementing high-quality codebase etc.

  As a result, I have grown to a full stack developer.

EDUCATION

Danang University of Science and Technology, Da Nang, Vietnam - *Engineer's degree of Information Technology*

Apr 2010 - Oct 2015
